# Mobile

In most of the cases you will design mobile-first interfaces, so its absolutely necessary to have a base canvas in the right sizes. Try to choose smaller devices to make sure that your design will fit all devices.

Iphone 8

**375 x 667**

Android

**360 x 640**

# Desktop

The 1920 x 1080 is a perfect size for the effective presentation of an interface design. Most of the desktop users have another resolution 4342x4232. But I would choose the following sizes, which provide great adaptability to all devices.

Desktop

**1440 x 1024**

# Tablet

Choosing the right tablet artboard should be a clear decision because more than half of users have the following screen size.

Tablet

**768 x 1024**

# Watch iOS

A very specific situation is if you're going to design for smartwatches. For those situations, I'm attaching the following two sizes of Apple Watch devices.

Watch 40mm

**292 x 320**

Watch 44mm

**330 x 364**

# Conclusion

Mobile

**375 x 667**

**360 x 640**

Desktop

**1440 x 1024**

Tablet

**768 x 1024**

Watch

**292 x 320**

**330 x 364**
